Altro Orchestra Custom - product guide

Altro Orchestra Custom is the perfect solution for creating the 'wow' factor, using the design of your choice, without compromising on the technical benefits. This floor is ideal for areas where people live, work and learn. It's perfect for areas where you want to make an impression, with the added benefit of 15dB impact sound reduction, comfort underfoot and low residual indentation.

This floor is supplied in two metre-wide rolls and has a 2.85mm thickness. It has been designed for areas where the risk of a slip is low. The minimum order volume of Altro Orchestra Custom is 40m^2, and then in 10m^2 increments. When ordering, we recommend you consider the space that the floor or wall is going into. What else is in the room? Where are the fixtures and fittings? Do you need to consider floor hatches etc? When your floor is on-site and ready to install, we recommend using the installation guidance for resilient flooring that can be found in the technical documents section of our website.

When specifying the amount of flooring needed for your installation, please allow extra to ensure you can match the design between flooring cuts. To help with this we have guidance, which can be found on our website - alternatively, please speak with your chosen flooring contractor, who will be able to help you with this calculation.
