Activiors™ Antimicrobial

PANELS | DOORS | TOPS | BESPOKE PRODUCTS

**Your Defense Against
Harmful Microorganisms**

PREMIER SOLUTION POWERED BY BLD

Activiors™

Surfaces have no ingredients that support microbial life.

Healthcare | Pharma | Lab | Commercial Kitchen

At Activiors™, we blend artistry with science to create exceptional antimicrobial surfaces. Here's why our sheets stand out:

Unique Color Range:

Our carefully selected mesmerizing colors reminiscent of nature. All our panel are delightfully distinct expect a play of shades and tones inherent to the Activiors™ visual.

Functional Excellence:

Activiors laminate sheets are non-porous and pure thermo-set composite materials. Ideal for wet areas, they offer antimicrobial properties, promoting hygiene and safety. Adhere them to a suitable substrate based on your desired properties.

Intelligence Precision:

Our process involves skilled technology, ensuring quality and uniqueness.

Various thickness, décor and pattern add character, unseen in small samples.

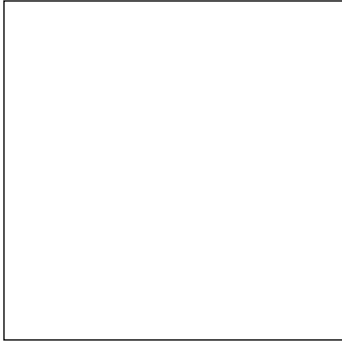

Embrace the undulations, no pores or holes—it's the mark of true craftsmanship.

Aging Gracefully:

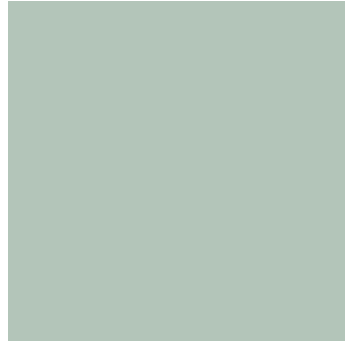

Like all materials, Activiors™ surfaces age and oxidize. Initially lighter in color, they gradually transform to match the samples you've chosen.

Upgrade your spaces with Activiors™ Antimicrobial Surfaces—where performance meets science for a safer world. Explore our collection today!

CHOOSE ACTIVIORS®
FOR A CLEANER,
SAFER ENVIRONMENT

Our panels come with an antimicrobial additive embedded during manufacturing. It works continuously throughout the panel's lifetime.

Activiors® acts as an extra line of defense. It inhibits the growth of MRSA, E. coli, Salmonella, and mold. Expect maximum effectiveness against these harmful micro organisms.

Features

- Active anti-microbial formulation
- Biostatic – inhibits the growth of bacteria
- Biocidal – kills bacteria
- Long lasting effect
- Lightweight
- Tough and durable, resistant to dents and scratches
- Smooth surface
- Water and moisture resistant
- Chemical resistant
- Non porous
- Easily bonded to substrates or surfaces
- Excellent fire performance
- Service temperature from -20°C up to 60°C
- 100% recyclable

Applications

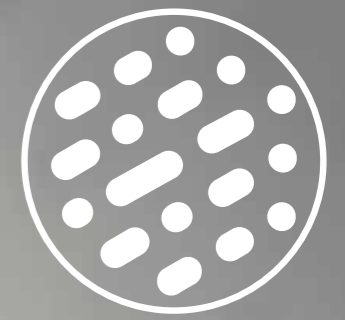

- Hospitals and medical facilities
- Surgical theatres
- Dentists
- Laboratories
- Food production areas
- Agricultural applications

Benefits

- Suitable for hygienic applications
- Protection maintained on worn or scratched surfaces or cut edges
- Retains the anti-microbial properties after fabrication
- Easy to handle and install
- Easy to clean
- Withstands frequent cleaning
- Does not absorb any microbial material
- Stain resistant
- Corrosion free
- Resistant to cracking and splitting
- Low maintenance
- Suitable for high condensation areas
- Suitable for use in a wide range of temperatures
- Fire rating – classified for internal use

Sheet size (mm)	Thickness
1220* x 2440	2.0, 2.5, 3.0 mm
