STAIR NOSINGS PROFILES

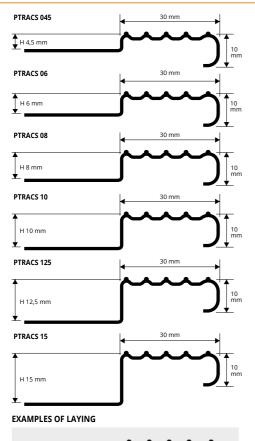

PROSTAIR ACC

BRUSHED STAINLESS STEEL AISI 304/1.4301-V2A

PROSTAIR ACC is steps protecting technical profile, designed and conceived to make the step scales made of ceramic, porcelain stoneware and others nonskid and non-slip ones; it's to be applied before the step laying process. Manufactured in aisi 304/1.4301-V2A glazed stainless steel, with the superior side level crimped in order to increase its adhesion. It replaces special ceramic elements in refined, resistant and economic way. It is compulsory in public places for the accident prevention. It is recommended for elegant, refined industrial, commercial and private environments: available in H 4,5-6-8-10-12,5-15 mm versions. Combining with the entire series of steel profiles recommended.

LAYING INSTRUCTIONS

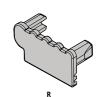

1. Choose the PROSTAR ACC of the desired height and material on the basis of the tile (steps) thickness. 2. Fix the first rising part laying it down at its appropriate and definitive level. 3. Fill completely the empty spaces under the profile with the tile adhesive. **4.** Spread out the adhesive on the tread, lay down the profile with its cut base immersed completely in adhesive and align it so that the profile covers the riser tile edge. **5.** Lay down the tread tiles and align them with the superior grazing part of the profile by drawing its back close and filling the inner space with the adhesive.

PROSTAIR GRIP ACC is an AISI 304/1.4301-V2A brushed stainless steel profile, consisting of a punched flange, ensuring perfect anchorage to the substrate, a 36,5 and 56,5mm horizontal visually exposed surface with the carborundum stripe insert and a 20mm vertical visually exposed flat surface. The profile is available in the heights 4,5/6/8/10/12,5/15/20 mm and is equipped with end caps made of varnished plastic in brushed steel-effect finish. The design of this profile together with the completing elements make it an elegant and appreciated solution also for modern stairs.

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1. Choose the PROSTAIR GRIP ACC in the required height, according to the thickness of the floor covering and the desired profile width; 2. Lay the floor covering on the stair riser and apply the adhesive on the of stair tread, where the profile will be installed; 3. Fill the empty spaces under the profile with the adhesive for tiles. Lay the profile on the step tread, making sure that it is aligned with the stair riser;

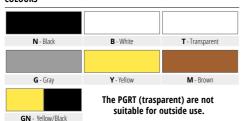

4. Lay the floor covering on the stair tread and align; 5. Plaster the joints between the profile and the tiles.

PROGRIP is a carborundum adhesive stripe, consisting of an elastic film coated with high wear resistant abrasive grains. It is usually employed in public as well as in domestic environments to make stair steps non-slip. The stripe is available in different colors and widths to meet any technical and aestetic requirement. If PROGRIP is applied directly on the step covering, it is advisable to apply two stripes on each step, rounding their ends.

PROSTAIR 50 is a technical square used to make the step nonskid and non-slip, protects the ceramic stairs steps preventing from accidents. It is made up of a rigid aluminium base equipped with a particular toothing on the vertical stem which strengthens the anchorage of the adhesive/tile to the square. The aluminium base varies according to the thickness of the tile used in the step, and to a lined insert in vinyl rubber available in several colors. The insert is already applied to the aluminium base. It is compulsory in public places in compliance with EEC norms and prevents from accidents.

PROTERMSTEP

NATURAL AND ANODIZED SILVER ALUMINIUM

PTSPAN/AA 08

PROTERMSTEP ALL is the new step cover profile made of natural and anodized aluminium. Designed to protect the edge of the step and to hide the joint between the tread and the step rise. The special notched shape in the upright stem provides it with excellent anchorage between floor/glue/profile.

PTSPAN/AA 10

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

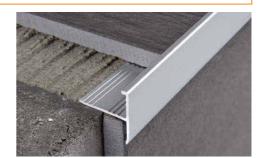

NATURAL ALUMINIUM

bar length **2,7 lm** - pack. **20 Pcs - 54 lm**

Article	H mm	€/lm	€/Pc
PTSPAN 08	8	3,38	9,13

PTSPAN 125	12,5	3,71	10,02
PTSPAN 15	15	4,03	10,88

1. Choose the PROTERMSTEP in the required width and colour according to the thickness of the tile (stairs). 2. First fix the riser part, placing it at the correct and final height. 3. Fill the empty spaces under the profile with the tile adhesive. 4. Apply the adhesive to the tread, lay the profile with the punched base fully sunk into the adhesive and align the profile so that its lip covers the edge of the riser tile. 5. Lay the tread tiles, aligning them so that they are flush with the upper and rear part of the profile and filling the internal part with adhesive.

PROSIDE WALK is a perimeter profile in varnished aluminium, available in grey and anthracite colour. It is designed to protect the edges of the tiles and the screed on pavements. The profile is equipped with a punched flange that ensures its fixing to the support. The flange is also provided with small holes that allow the momentary fixing of the profile with nails. To reach a right connection between profile and the waterproofing system it's needed to use PROBAND 150 with PROBAND KOLL/AB. The product is also available on request in BENDABLE VERSION and with a SPECIAL SEASIDE PRE-TREATMENT which increases its resistance to corrosion when installed at sea front environments.

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1. Choose PROSIDE WALK according to the tile thickness and desired colour. 2. Waterproof with PROBAND 150 and PROBAND KOLL the front of the screed. 3. Fix the external corners with nails. 4. Cut PROSIDE WALK to the desired length and fix it with nails; connect it with the corners using the junction element. 5. Lay the tiles, leaving about 5 mm between tiles and profile. 6. Seal the space between tiles and profile with PROBAND FIX (PRBFX). PROFILE BENDING: 1) Cut the anchoring flange into sections and engrave the metal close to the vertical side 2) bend the profile with the help of a template;

PROSTAIR LED

ANODIZED SILVER ALUMINIUM - FLAT - LED

PROSTAIR LED is an aluminium profile available in the silver anodized finishes, that can be fixed with adhesive or dowels to the step tread. It has a grooved non-slip 52,5mm wide horizontal surface and an integrated LED lighting system, placed on its 43,5mm high vertical side. The integrated LED system generates cold or warm light and is protected by a matt or transparent polycarbonate plate, provided with a special fixing system, that allows it to be removed any time maintenance on the lighting system should be required. Its design and to the range of finishes available, together with its easy installation make **PROSTAIR LED** an appreciated solution both in public and in residential spaces.

1. Choose PROSTAIR LED depending on the desired finish, light effect and polycarbonate plate; 2. If you are using the version with adhesive, clean first the surface where the profile will be installed. Once the surface has dried, remove the protective film and install the profile, applying adequate pressure on it; 3. If you are using the punched version, place the profile on the step tread and mark the position of the profile holes on the step tread; 4. Drill the step tread and fasten the profile using plugs; 5. Connect the LED to the low tension power supply and install the polycarbonate plate.

PROSTYLE

ROUNDED STEP NOSING STAINLESS STEEL AISI 304/1.4301-V2A

PROSTYLE is a technical/decorative profile in stainless steel AISI 304/1.4301-V2A for ceramic tile/wood steps. Its particular rounded shape has been conceived to create the "torus" of the step, which is normally created with special pieces. Elegant profile for all public/private environments. In order to perfect placing and to look after details, external angles and closing caps are available.

PROWALK ACC

POLISHED STAINLESS STEEL AISI 304/1.4301-V2A PUNCHED OR SELF ADHESIVE

PROWALK ACC is steps protecting steel profile for existing scales. Its superior side level is crimped in order to increase its adhesion. Available in version or with holes either with adhesive. Available sizes: 30 x 10, 30 x 20, and 30×30 mm. All profiles are protected with protective film. It's ideal for the edges protection and screening as well as of the corner between the rising and the tread which is the point of the greatest strain.

PROGRIP is a self-adhesive product in carborundum consisting of a plastic film plus abrasive granules with high resistance to wear. It is normally used to guarantee safety on steps in public and private environments, as required by accident-prevention laws. Available in various colours and widths to meet all technical and aesthetic requirements. It is advisable to apply 2 strips on each step, rounding off the ends.

1. Choose the suitable profile for covering the edge of the step. 2. Clean the surface on which the profile is to be laid, ensuring that it is grease-free and dry. Do not apply the strips at temperatures below 15°. **3.** Remove the protective paper from the adhesive and lay correctly by applying pressure evenly over the whole profile

without using a hammer.

If the punched PROEND GRIP has been chosen, screw the profile to the step and apply the adhesive carborundum to hide the screws.
